TEAM EsTEAM. Keeping you informed on the latest and greatest with TEAM Santa Rosa.
Please reply to this email if you wish to be removed from the EsTEAM distribution list.

TEAM is coordinating tours of GEO's Blackwater River Correctional Institute construction project in East Milton. Weekly 30-minute tours are available in August for up to three persons at a time. Monthly one-hour tours are also available over the duration of construction for up to six people per visit. See attached aerial photo of the site at its current construction phase.

After more than five years of negotiations between TEAM Santa Rosa, NAS Whiting Field and Santa Rosa County Commission, the Whiting Field Limited Use Agreement has officially been signed by the County and NAS Whiting Field. The agreement grants runway access to tenants in the Whiting Aviation Park and provides more product for TEAM to market to companies looking to locate to Santa Rosa County. The next step involves TEAM Santa Rosa and the Board of County Commissioners working toward construction of the park's entrance.

TEAM Santa Rosa helped preserve a local economic asset. AppRiver in Gulf Breeze was considering a move to Austin Texas. TEAM Santa Rosa advocated with local government for them to stay and helped establish incentives for their recently announced expansion and training initiative. Their operation in Santa Rosa County will expand by more than 80 employees.

TEAM Santa Rosa has begun planning for the new Northwest Florida Industrial Park at I-10 to include a partnership of public and private land adjacent to I-10 and Highway 87. It will be one of the largest multiuse industrial parks in Northwest Florida.
